## OUR EXPERIENCE EXPERTS

vtech specializes in technological and CCTV services such as product engineering, warranty management, building cloud, infrastructure, network, etc. We put a strong focus on the needs of your business to figure out solutions that best fits your demand and nail it.

An intercom, also called an intercommunication device, intercommunicator, or interphone, is a stand-alone voice communications system for use within a building or small collection of buildings which functions independently of the public telephone network.

Vehicle CCTV is proven to help protect your fleet assets and people—significantly reducing fault claims by up to 60%. The Global Positioning System (GPS) is a satellite constellation supporting highly accurate positioning, navigation and timing (PNT) measurements worldwide

### CCTV

Setting up cameras in strategic locations to ensure optimal coverage.

### INTERCOM

Customized security system planning to meet specific requirements.

### RF NETWORK

Regular Servicing and fixing of camera system to ensure continuous functionality

### VEHICLE GPS

Real-time monitoring of security cameras by professionals or automated systems.

### BIO METRICS

Offering cloud storage plans for secure, offsite storage of CCTV footage.

### CAMPUS WIFI

Upgrading older analog systems to IP-based or HD analog systems.

### VEHICLE CCTV

Assessing the property to determine optimal camera placement.

# TYPES

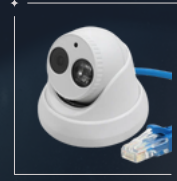

## CCTV

When it comes to securing your business, there are many different types of CCTV to choose from. Surveillance plays a huge part in today's society, and with cameras all around us, our day-to-day lives are experiencing higher levels of security each day.

## TYPES OF CCTV

- ✓ Dome CCTV camera
- ✓ Bullet CCTV camera
- ✓ C-Mount CCTV camera
- ✓ Infrared/Night vision CCTV camera
- ✓ Network/IP CCTV camera
- ✓ Wireless CCTV camera

## INTERCOM SYSTEM

An intercom system is a two-way communication electronic device that contains circuitry for the purpose of transmitting and receiving audio and/or video transmissions. With the advent of cellular communication, digital telephone systems, and other communication devices, the use of intercoms has declined. However, there are still lots of applications where these devices still work better than anything else.

## TYPES OF INTERCOM

- ✓ Wireless Intercom
- ✓ Wired Intercom
- ✓ Video Intercom
- ✓ Outdoor Intercom
- ✓ Door and Gate Intercom
- ✓ Telephone Intercoms

## RF NETWORK

An RF (Radio Frequency) network utilizes radio waves to transmit data between devices, offering wireless communication capabilities. This technology is used in various applications like internet access, wireless LANs, and broadcasting.

## GLOBAL POSITIONING SYSTEM

The Global Positioning System (GPS) is a space-based satellite navigation system that provides location and time information in all weather conditions, anywhere on or near the Earth where there is an unobstructed line of sight to four or more GPS satellites. The system provides critical capabilities to military, civil and commercial users around the world. It is maintained by the United States government and is freely accessible to anyone with a GPS receiver.

## BIO METRICS

Biometrics refers to the automated recognition of individuals based on their unique biological and behavioral characteristics. These characteristics can be physical (like fingerprints, iris scans, or facial recognition) or behavioral (like signature dynamics or voice recognition). Biometrics is used for identification and authentication in various applications, including security systems, access control, and identity management.

## CAMPUS WI-FI

The Wi-Fi LAN has a broad application nowadays. Because of the comfortable and quick installation people often replace old wire LANs with Wi-Fi such connection allows to move your machine around the place without losing the Internet or other network resources. Working on your laptop you can check your mail from anywhere in your home or office.

## VEHICLE CCTV

Vehicle CCTV is proven to help protect your fleet assets and people – significantly reducing fault claims by up to 60%.

Vehicle CCTV recording delivers vital encryption-level data to support against false claims and protect the integrity of your business.

# CCTV AMC

## ANNUAL MAINTENANCE CONTRACT

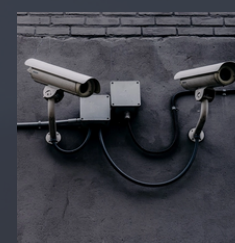

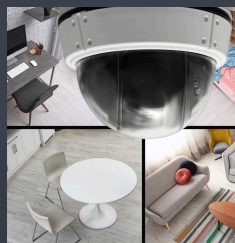

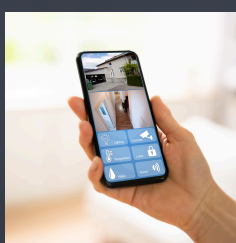

Do you have a CCTV System which you purchased from a vendor who never came back after installation?

Well, that's common, and the reason is that manufacturers work through dealers who sell to resellers and finally reaching out to end user. The process is so long that the person, who is supposed to service you at the end, turns out to be someone who does not even know about the device. We are different. We are a CCTV installation service provider & repair CCTV through AMC. Thus we ensure that there are only experts in our company, meant for the job.

SV tech agrees to provide the following services under this agreement to keep the system in good working order, save for circumstances beyond the control of svtech. Annual Maintenance Contract Terms and Condition for CCTV Camera in the Annual maintenance contract for the CCTV Camera, DVR and power supply. The Annual maintenance contract shall be non comprehensive and includes repairing and services of all hardware including CCTV Camera, DVR power Supplies.
